Vesta Alarm Systems

Panels

The Vesta alarm panels are the perfect combination of power, speed, and connectivity in a single device, offering unmatched security and control. These advanced control panels redefines protection.

PIR Detectors

The Vesta PIR Detectors are suitable for both indoor and outdoor use. Equipped with high-resolution images, anti masking, long range coverage, these devices guarantee reliable security over large areas.

Door Contacts

Vesta door contacts are an essential component, providing reliable detection for any unauthorized entry. With advanced features like tamper detection and long-lasting battery life. Suitable for front doors, windows, or any access point.

Sirens

Vesta sirens are designed to provide loud, attention-grabbing alerts in the event of a security breach. They're built for both indoor and outdoor use, featuring weather-resistant designs

Arm/Disarm

Vesta arm and disarm products offer convenient and secure ways to control your alarm system with ease. Whether using a key fob or keypad these products allow for quick arming and disarming of your system.

Smoke Detectors

Vesta smoke detectors are designed to quickly detect smoke and alert you to potential fire hazards. With advanced sensing technology, they offer fast and reliable detection, helping to minimize risks and ensure the safety of your property.

Additional Products

Vesta offers a wide range of security products. From panic buttons, to solar panels and dongles. Vesta delivers comprehensive protection, making security easier and more efficient for both homes and businesses.

Security Towers

Designed to provide superior security and monitoring capabilities wherever you need them. Whether you're securing a construction site, a temporary event, or a large facility, our security towers and PIDS offer a flexible, scalable, and highly effective approach to protecting your assets.
Key Features:

- **AI-Powered Monitoring:** Equipped with advanced AI technology, our towers offer real-time surveillance with intelligent analysis, ensuring swift threat detection and response.
- **Mobile & Easy to Deploy:** Designed for portability, Wall2Wall Security Towers are perfect for both short-term and long-term security needs. Set up is quick and hassle-free, providing immediate protection without the need for extensive infrastructure.
- **24/7 Remote Access:** With secure cloud-based connectivity, you can monitor and control the towers remotely from anywhere at any time, ensuring constant visibility and peace of mind.
- **Weather-Resistant & Robust:** Built to withstand the elements, our security towers are constructed with durable materials to ensure optimal performance in even the harshest conditions.
- **Customizable & Scalable:** Whether you need a single unit or a multi-site solution, Wall2Wall Security Towers can be tailored to fit your specific requirements. They are fully scalable to grow with your security needs.

Insytly Monitoring

Insytly simplifies the management of solar-powered and AC-connected security systems, reducing callouts, minimising downtime and optimising uptime with advanced analytics and seamless integrations. The platform eliminates concerns related to battery health and power management. Insytly offers remote reboot, GPS tracking and geofencing to monitor tower locations and detect movement—all managed from a single, intuitive dashboard.

HUB2

- Wide power input for 12V-48V battery types (including lithium) with accurate battery charging status and voltage.
- 2G/4G LTE-CAT1 Connectivity for Europe or Global on all networks, the same as your mobile phone device.
- 2x VE-Direct integration via a single cable.
- 10+ IO channels 0-72V, 0-10K, 0-10V.
- Onboard accelerometer for shock and tilt detection.
- 5 minute updates for as little as £6 ex VAT per month.
- Power usage as low as 5mAh @ 12VDC with GPS.
- Live control of 4 7.5A circuits for control or reset mode.
- UK Manufactured, Developed & Hosted.

LITE

- Works with 12V, 24V, 36V and 48V, all battery types (including lithium) allowing for accurate battery charging status and voltage.
- 2G/4G LTE-CAT1 Connectivity for EU, Regional or Global on all networks, the same as your mobile phone device.
- 15 minute updates for as little as £4 ex VAT per month. GPS allows for constant tracking and location of assets including geofencing.
- Minimal power consumption of 4mAh @ 12VDC with GPS.
- Lifetime data storage and access as standard. Made in the UK with a full UK Support, App and Development Team.
