

# REDSCAN Lite RLS-1010L

Indoor 2D LiDAR sensor for high-security applications

REDSCAN Lite is a high-precision intrusion detection sensor that creates an invisible virtual laser wall for total coverage of areas up to 10 m x 10 m. Using advanced time-of-flight technology, it instantly and reliably detects regardless of lighting or temperature conditions.

Engineered to meet the strictest security standards, REDSCAN Lite is compact and easy to deploy for seamless protection of narrow or constrained spaces such as skylights, glass walls, server racks, ventilation shafts and other sensitive or restricted areas.

## Ease of installation

<p><b>Laser scanning path visualisation</b></p>  <p>NO POWER REQUIRED</p> <p>Laser Alignment Tool (RLS-LAT) enables visualisation of the detection area.</p>	<p><b>Simple angle adjustment</b></p>  <p>NO POWER REQUIRED</p> <p>The emission angle can be adjusted by rotating the side knobs on the range of <math>\pm 3^\circ</math>.</p>	<p><b>Automatic area correction</b></p>  <p>Area Set activates automatically at power-on. Automatic area correction prevents overspill outside of the detection zone.</p>
---	---	--

## Useful set up features

- PC-less area set up, simply use the optional tool RLS-LAT and the side knobs to align the sensor and set the detection area without power.
- LED status indicator for instant alignment feedback
- Streamlined web interface for easy setup, tuning and maintenance
- Omni-directional mounting plate to install the sensor in any direction
- Selectable power options supporting PoE and/or DC input

## Detection history analysis

The maintenance screen allows intuitive parameter adjustment based on the alarm history.

## Versatile mounting options for a wide range of indoor applications

### Wall mount

Mount directly to a wall for vertical detection coverage of windows, racks, doors or corridors.

### Ceiling Mount

Ideal for overhead detection from above skylights or open indoor zones.

### Bracket Mount

Use with optional bracket to achieve angled or custom positioning based on application needs.

Model	RLS-1010L
Installation location	Indoor
Detection method	Infrared Laser Scan
Laser protection class	Class 1
Power input	10.5-30 VDC, PoE(IEEE 802.3af compliant)
Current draw	500 mA max. (12 VDC), 250 mA max. (24 VDC), 6 W max. (PoE)
Mounting method	Wall mount, Ceiling mount, Bracket mount
Detection area	10 x 10 m, 95 degree (approx. 33 x 33 ft)
Detection range	Up to 15m (50ft) at 10% reflectivity
Detection resolution/ Response time	0.125 degrees/within 100 msec. to 1min
Maintenance port	Ethernet RJ-45 10BASE-T/100BASE-TX (Auto negotiation)
Communication port	RS-485
Output	3 outputs, 28 VDC 0.2 A max. N.C.
Input	1 Non-voltage contact input
Alarm period	Approx. 2 second delay timer
Operation temperature	-20°C to 50°C (-4°F to 122°F)
IP rating	IP55
Dimensions (H x W x D)	118 x 115 x 96 mm max. (4-5/8 x 4-1/2 x 3-3/4 inch)
Weight	680 g (1.5lbs.)

## Detection range
