ALARM INTEGRATION

ALARM KEYPAD

The External Alarm Keypad is a smart external keypad that is compatible with **Videofied, Ajax Ready, Vesta and Vigileyez** alarm systems. It enhances site security and access control with the following key features:

- Tamper protection and poling capability for secure installation and reliable operation.
- Allows users to turn alarms on and off from the point of entry, and issue temporary user codes, eliminating the need to share sensitive alarm code, enroll users on any apps or distribute fobs and tokens to visitors or contractors.
- Save time and reduce costs.
- Rapid deployment and easy installation on virtually any surface, fencing, or gate.
- No external power required, ensuring it can be retrofitted onto any existing compatible alarm system effortlessly.

This innovative solution streamlines site security management, making it highly efficient for sites with temporary visitors, contractors, or frequent access needs.

ALARM INTEGRATION

All Loxal products are compatible with Videofied, Ajax (Ready), Vesta and Vigileyez.

This integration enhances site security and access control.

Turn alarms on and off from the point of entry: this eliminates the need to share sensitive alarm codes, enroll users on apps or distribute fobs and tokens to visitors or temporary users.

Tamper protection and poling, for secure installation and reliable operation.

Early tamper signals when connected to key safes etc.

Saves time and reduces costs.
