Distribution Specialists

Wall2Wall Security is the UK's exclusive distributor of the Vesta alarm system range – one of the most advanced and flexible wireless security ecosystems available today.

We supply professional installers, security companies, and construction firms with reliable, site-ready systems designed for real-world environments.

Battery-powered, rapid deployment, and app-controlled coverage makes every install faster, smarter, and hassle-free.

SECTORS WE SERVE

Security Installers

Rapid wireless deployment, no cable runs.

Construction & Scaffolding

Battery-powered coverage for temporary sites.

Void & Vacant Properties

Remote supervision of empty premises.

The Most Flexible Alarm System on the Market

● No Mains Power Required

Long-life batteries across every device. Up to 14 months on the control hub, up to 10 years on peripherals.

● Fully App Controlled

Arm, disarm, receive live alerts and manage every zone remotely from your smartphone – anywhere, anytime.

● Up to 2km Wireless RF Range

No cables, no drilling, no infrastructure. Up to 640 wireless zones per panel across large sites.

● EN50131 Grade 2 Certified

Fully compliant for professional and commercial installations. UL1023 certified peripherals available.

● Live Remote Supervision

Real-time reporting viaGPRS/3G/4G LTE. Stay connected to every site without being on-site.

● Accounts Welcome

Open an account for access to the full Vesta range, technical support and next-day UK delivery.

Control Units & Detection

The core of every Vesta installation — self-contained, battery-powered and 4G connected.

VESTA-068N

Battery Control Unit

Self-contained hub with 14-month battery life on D-cell batteries. Real-time reporting via GPRS/3G/4G LTE. Supports up to 32 PIR cameras for scalable site coverage.
